

Window Diorama Card Instructions and Template

- Cut cardstock at 6.5" (see solid line above) along long (11") side.
- Score from left short side at 1", 2", 5.5", 6.5", and 10" (see dotted lines above)
- Cut out a 2"W X 3"L window using a square punch. Depending on your punch size, you may need to punch multiple squares to cut the entire rectangle out.
- Trim .25" off the left side (AFTER you have scored using the measurements above) so that it does not show through the front window opening.
- Stamp, embellish and then assemble into the box shape. Attach right sides to form box.
